

VERSION WITH MARKINGS TO SHOW CHANGES MADEIN THE CLAIMS

Claims 35, 42 and 49 have been amended as follows:

35. (amended) An elongated spacer stock used in the manufacture of a spacer frame to space sheets of an insulating unit, the spacer stock comprising:

an elongated base having a supporting surface;
an elongated first leg having a first elongated member joined to the elongated base and a second elongated member joined to the first elongated member of the first leg and having an end portion positioned over the supporting surface of the base;

an elongated second leg having a first elongated member joined to the elongated base and a second elongated member joined to the first elongated member of the second leg and having an end portion positioned over the supporting surface of the base, the first elongated member of the first leg and the first elongated member of the second leg and the base joined together to have a U-shaped cross section; and

a bead on the supporting surface of the base with portions of the bead between the supporting surface of the base and the end portion of the second legs elongated members of the first and second ~~members~~ legs.

42. (twice amended) A spacer frame to space sheets of an insulating unit comprising:

an elongated base having a supporting surface;
an elongated first leg having a first elongated member joined to the elongated base and a second elongated member joined to the first

elongated member of the first leg and having an end portion positioned over the supporting surface of the base;

an elongated second leg having a first elongated member joined to the elongated base and a second elongated member joined to the first elongated member of the second leg and having an end portion positioned over the supporting surface of the base, the first elongated member of the first leg and the first elongated member of the second leg and the base joined together to have a U-shaped cross section; and

a bead on the supporting surface of the base with portions of the bead between the supporting surface of the base and the end portion of the ~~second legs~~ elongated members of the first and second ~~members~~ legs.

49. (amended) An insulating unit comprising:

a pair of sheets;

a spacer frame between and adhered to the pair of sheets by an adhesive, the spacer frame comprising:

an elongated base having a supporting surface;

an elongated first leg having a first elongated member joined to the elongated base and a second elongated member joined to the first elongated member of the first leg and having an end portion positioned over the supporting surface of the base;

an elongated second leg having a first elongated member joined to the elongated base and a second elongated member joined to the first elongated member of the second leg and having an end portion positioned over the supporting surface of the base, the first elongated member of the first

leg and the first elongated member of the second leg
and the base joined together to have a U-shaped
cross section; and

a bead on the supporting surface of the base
with portions of the bead on the supporting surface
of the base and the end portion of the second ~~leg~~
elongated members of the first and second
~~members~~legs.
